Dear Milt:

I would like to let you know about the great results we have found with our implementation of your Lickety-Split program. In short order, we were able to automate shop order entry and reduce a 4 hour per day process to a mere 30 minutes. This single project has paid for the implementation in just a couple of months. We have also developed an automated shop order close solution which saves significant data entry time as well. We expect to find additional opportunities for time savings as we move forward.

I have found the scripting to be very intuitive, allowing you to design a solution quickly without much learning curve at all. Thanks for the great product!

Regards,
