

By Invitation Only[®]

Composing an airtight guest list for BPCS / ERP LX

Software download available here

Please find the row in the chart below which correctly describes your BPCS / ERP LX version level. The downloads available here work at IBM operating system levels V5R3, V6R1, and V7R1.

Version of BPCS or ERP LX	Click to access the .zip download file
BPCS v4.05CD	✓
BPCS v6.x	✓
BPCS v8.1.x	✓
BPCS 8.2	✓
BPCS 8.2.1	✓
ERP LX v8.3.x	✓

Please call if you need advice/assistance

You will need a temporary demonstration key or a permanent license key to operate By Invitation Only after the download has been completed.

Prior to BPCS v8.2, the structure of the BPCS vanilla files which held user authority definitions was fairly uniform. That changed above v8.1.x in fact, we have witnessed minor changes to those files at a variety of v8.x.y.z levels. Therefore, it's not a sure thing that the By Invitation Only software available for download here will connect flawlessly with your specific version of BPCS. If that happens to you, we apologize. Tell us; we have invented an efficient approach to fix it.
